Advantages of Front Fork Upgrade YSS :

- PD fork valve provides progressive response to the front fork (front shock).
- PD valve is designed as a valve housing (piston) that is produced using aluminum 6061, very light material.
- Damping (shock pressure) is adjustable towards the need or road conditions.
- The spring features hard / soft adjustment without the need to disassemble the front shock.
- Excellent for racing, touring or daily usage purposes (on road / off road).
- Available for all type of motorcycles that use conventional front shock with various measurements.
